

Front-end developer who loves using React, Vite, Tailwind, and Bootstrap to build responsive and user-friendly websites. I've created real-world projects, UI clones, and WordPress/Elementor pages, all with a strong focus on UI/UX design. I'm currently expanding my skills into the MERN stack to become a well-rounded developer.

EDUCATION

2019 - 2025 BSIT - Computer Technology	2017 - 2019 TVL - Information and Communication Technology
TALISAY CITY COLLEGE	TALISAY CITY SENIOR HIGH SCHOOL

WORK EXPERIENCE

Website Developer Intern / Armada Logics, Inc.

Full-time (Remote) - 800 hours

- Completed an internship focused on intensive training in Web Fundamentals, Java, and React.js
- Accomplished over 100 hands-on tasks and challenges, strengthening skills in HTML, CSS, JavaScript, Bootstrap, Java OOP, and React component-based development
- Participated in regular code reviews to improve writing clean, efficient, and maintainable code
- Built a front-end Food App using Bootstrap and JavaScript, applying real-world UI/UX practices and responsive design
- Gained a strong foundation in front-end development and practical problem-solving

Front-end Developer Intern / Open'Space Technologies, Inc.

Full-time (Hybrid - Cebu) - 800 hours

- Developed a custom front-end travel application using WordPress, Elementor, HTML, CSS, and JavaScript for a client demo
- Showcased a fully responsive design with a user-friendly layout
- Implemented interactive sections including destinations, booking forms, package listings, dynamic payment flow, and an admin dashboard
- Actively improved development skills during free time by exploring new technologies to enhance project quality and stay updated

Sales Representative / Concentrix

Full-time Working Student (Onsite - Cebu)

May 2023 - Jan 2024

- Sold and activated satellite radios for current and new SiriusXM customers
- Provided technical assistance for radio, financial, and account-related issues
- Strengthened problem-solving skills and logical thinking
- Improved ability to troubleshoot complex systems – valuable in programming

Technical Support / StraightTalk

Full-time Working Student (Onsite - Cebu)

June 2022 - December 2022

- Sold StraightTalk SIM cards and activated customer subscriptions
- Provided customer support for technical and troubleshooting inquiries
- Strengthened analytical thinking and attention to detail
- Developed real-time problem-solving skills applicable to programming and software debugging

SOFT SKILLS

- Customer Service & Technical Support
- Effective Communication & Active Listening
- Technical Troubleshooting & Logical Thinking
- Problem Solving Under Pressure
- Time Management & Multitasking
- Adaptability & Flexibility in Fast-Paced Environments
- Team Collaboration & Cross-Functional Coordination
- Critical Thinking & Analytical Reasoning
- Attention to Detail & Data Accuracy
- Presentation & Reporting Skills
- Ability to Interpret and Communicate Data Insights
- Continuous Learning & Self-Motivation

PROJECTS

School Website

A responsive, performance-optimized website showcasing school information, programs, enrollment, events, and services. Includes contact details for inquiries. Backend integration coming soon

Tech used: HTML5, CSS3, Bootstrap, JavaScript, AOS, Formsubmit, Git, GitHub

Online Movie Streaming

A responsive movie streaming web app that allows users to browse, search, add watch list and view movie trailers in real-time.

Tech used: React.js, TailwindCSS, JavaScript, Axios, React Router, Node.js, Express.js, MongoDB, Git, GitHub

Travel App

Built a fully responsive travel app UI featuring package tours, chat functionality, an admin dashboard, and a chat inbox. Showcased dynamic UI, mobile-ready design, and real-time interactivity for a client demo.

Tech used: WordPress, Elementor, HTML5, CSS3

Web Fundamentals, Java & React.js course

Completed a comprehensive training program covering core web development principles, Java programming, and React.js.

- Learned HTML5, CSS3, and modern responsive layout techniques with a focus on UI/UX best practices and semantic markup
- Studied Java with strong emphasis on Object-Oriented Programming (OOP)
- Built dynamic front-end applications using React.js, mastering component-based architecture, state management, hooks, and API integration with Axios
- Completed the React.js portion during a remote internship with Armada Logics, Inc., applying real-world development standards and workflows
- Developed cloned UI projects of real-world websites like Netflix, GitHub, StackOverflow, and SM Appliances to reinforce HTML, CSS, and JavaScript skills under tight deadlines

CERTIFICATES

Certificate of Completion (Internship)

Armada Logics, Inc.

Web Fundamentals Training Certificate

Armada Logics, Inc.

Certificate of Employment

Qualfon

Certificate of Completion (Internship)

Open'Space Technologies

TECHNICAL SKILLS

Front-End Development

- HTML5, CSS3, SCSS, JavaScript, React.js, React Router, Redux, Zustand, Axios, AOS
- Tailwind CSS, Bootstrap, DaisyUI
- WordPress, Elementor

Back-End & Full Stack

- Java (OOP), SQL
- Currently learning the MERN Stack (MongoDB, Express.js, React.js, Node.js)

Tools & Platforms

- VS Code, IntelliJ, Git, GitHub, Local by Flywheel

Design & UI/UX

- Figma, Responsive Design, Component-Based Architecture

Data Analytics

- Power BI, Excel, SQL
- Data Visualization, Data Cleaning, Data Transformation, Data Modeling
