## EDUCATION

2019 - 2025 | BSIT

Computer Technology

TALISAY CITY COLLEGE

## TECH SKILLS

### LANGUAGES:

HTML5, CSS3, JavaScript, Java  
SQL

### TOOLS & PLATFORMS:

VS Code, IntelliJ, Figma, WordPress  
Elementor, Locally, Git, GitHub

### JS LIBRARIES & UTILITIES

React.js, React Router, Redux,  
Zustand, Axios, AOS

### CSS FRAMEWORKS & UI STYLING

Tailwind CSS, Bootstrap, SCSS

## ADDITIONAL SKILLS

Customer Service & Support

Effective Communication & Active  
Listening

Technical Troubleshooting

Communication and Interpersonal

Problem Solving under Pressure

Time Management & Multi Tasking

Adaptability and Flexibility in Fast-

Paced Environments

Team Collaboration & Cross-

Functional Coordination

# Junyl Cabusas

## WEBSITE DEVELOPER

I am a passionate developer dedicated to creating modern, fully functional websites using the latest tools, libraries, and frameworks. While I currently specialize in front-end development, I am eager to expand my skill set and learn new technologies. My goal is to continuously grow as a developer and contribute to meaningful, impactful projects.

## WORK EXPERIENCE

### Website Developer Intern / Armada Logics, Inc.

Full-time (Remote)

800 hours

During my internship, I focused on intensive training in Web Fundamentals, Java, and React.js to become job-ready in web development. I completed over 100 hands-on tasks and challenges that strengthened my skills in HTML, CSS, JavaScript, Java OOP, and React component-based development. I regularly participated in code reviews, which enhanced my ability to write clean, efficient, and maintainable code. As part of the training, I built a front-end Food App using Bootstrap and JavaScript, applying real-world UI/UX practices and responsive design. This experience gave me a strong foundation in front-end development and practical problem-solving.

### Front-end Developer Intern / Open'Space Technologies, Inc.

Full-time (Hybrid - Cebu)

800 hours

Developed a custom front-end travel application using WordPress, Elementor, HTML, CSS, and JavaScript for a client demo, showcasing a fully responsive design and user-friendly layout. The project includes interactive sections such as destinations, booking forms, package listings, a dynamic payment process flow, and an admin dashboard. During my free time, I actively focused on improving my development skills and exploring new technologies to stay updated and enhance project quality.

### Sales Representative / Concentrix

Full-time Working Student (Onsite - Cebu)

May 2023 - Jan 2024

Sold and activated satellite radios for current and new SiriusXM customers; provided technical assistance for radio, financial, and account-related issues – an experience that strengthened my problem-solving skills, logical thinking, and ability to troubleshoot complex systems, all of which are valuable in programming.

### Technical Support / StraightTalk

Full-time Working Student (Onsite - Cebu)

June 2022 - December 2023

Sold StraightTalk SIM cards, activated subscriptions, and provided customer support for technical and troubleshooting inquiries – which enhanced my analytical thinking, attention to detail, and ability to solve real-time technical issues, skills that directly support my growth in programming and software debugging.
